

Acquire Valued Customers

predict repeat buyers

Mudassir Syed

Project

➤ Predict Repeat Customer

- Businesses run discounts on select items to increase sales and make the customers repeat their purchase.
- Data used in this project is of customers transactions, history and offers.
- Original data comprises of almost 350 million rows of completely anonymized transactional data from over 300,000 shoppers.
- This project deals with a subset of original data.

➤ Outcome from this Project

- Provide insights into shopping patterns of customers.
- Predict the repeat buyers based on different features.

Clients

➤ Subscription Businesses

- Companies with Business Model revolving around Subscriptions/renewals
- Companies interested in building customer base

➤ Grocery Stores

- Which products when offered discount sell more
- Help convert customers to repeat buyers
- Retain existing customers

Data Acquisition

- Retrieved dataset from <https://www.kaggle.com/c/acquire-valued-shoppers-challenge/data>
- This data comprises anonymized fields with transactions for 1 year along with Offer and Offer History information.
- Acquired dataset is reduced to manageable size for EDA and Model building.

Dataset Exploration

- 16000 Customer records
- 1.6 GB (transactions)
- 875 KB (history)
- 1.8KB (offers)

Data Dictionary

- ***transactions***

id - A unique id representing a customer

chain - An integer representing a store chain dept - An aggregate grouping of the Category (e.g. water)

category - The product category (e.g. sparkling water)

company - An id of the company that sells the item

brand - An id of the brand to which the item belongs

date - The date of purchase

productsize - The amount of the product purchase (e.g. 16 oz of water)

productmeasure - The units of the product purchase (e.g. ounces)

purchasequantity - The number of units purchased

purchaseamount - The dollar amount of the purchase

Data Dictionary

- ***offers***

offer - A unique id representing an offer

category - The product category (e.g. sparkling water)

quantity - The number of units one must purchase to get the discount

company - An id of the company that sells the item

offervalue - The dollar value of the offer

brand - An id of the brand to which the item belongs

- ***history***

id - A unique id representing a customer

chain - An integer representing a store chain

offer - An id representing a certain offer

market - An id representing a geographical region

repeattrips - The number of times the customer made a repeat purchase

repeater - A boolean, equal to repeattrips > 0

offerdate - The date a customer received the offer

Data Aggregation & Feature Selection

- Merge Offers and History data with OfferId into Hist_Offer
- Category, Company, Offer and Brand are correlated to target variable 'repeater'
- Chain and Market have little correlation to target variable

Explanatory Data Analysis

➤ 27 % of Customers repeat purchase when Offered discount coupon

Explanatory Data Analysis

➤ Returntrip count for each category

Acquire Valued Customers

Explanatory Data Analysis

➤ Category 3203 was offered to 27 % Customers

Explanatory Data Analysis

➤ More than 4000 customers were Offered coupon 1197502

Explanatory Data Analysis

- Top 25 highly transacted Categories which could have impact on prediction

Data Aggregation

➤ Aggregate purchase amount and quantity of transactions data for each customer.

➤ Merge aggregated transactions and Hist_Offer.

Model Evaluation & Selection

- Evaluated below 3 Classification Models

	Logistic Regression	Decision Tree	Random Forest
AUC Score	0.54	0.50	0.61

- Its evident from above metrics, that logistic regression is not the best model for this project
- Random Forest have produced better results for $n_estimators = 20$

Model Evaluation & Selection

Acquire Valued Customers

Recommendations to Clients

➤ Factors Influencing customers to repeat purchases

- Category, Company, Brand of the offered product
- Purchase History of Category, Company, Brand

➤ Recommendations to Companies

- Offers are effective way of improving sales and retaining customers
- Choose right Offer for products of Category, Company, Brand

Thank You.
